• Oleksiy is very good at encouraging a depth of learning with each assignment/project that we do, he also gives us a good high level understanding of every presented topic which allows us to create our own solutions to the code. The TA's are also very helpful in guiding us onto the right path.

• The projects, at least for me, have been fun and interactive. They keep my attention and want me to see them to the end.

34 - Given your primary mode of participation, what is helping your learning?

Oleksiy Al-saadi

Response Rate	8/11 (72.73%)

• Being in the classroom setting and having easy access to help and guidance.

• One on one questions during work time

• Having so many TAs

• teacher and student interactions

• Working in class with TAs

• The interaction with students individually helping them learn each part of the course and reteaching it if someone does not understand something.

• Being able for TAs and Oleksiy to be able to see my code in person and also give me help. Computer Science and coding in general can be difficult to understand sometimes when not presently in a classroom.

• I believe that being able to ask questions during lab and getting direct feedback.

---

35 - Given your primary mode of participation, what is hindering your learning?

Oleksiy Al-saadi

Response Rate	7/11 (63.64%)

• N/A

• Not enough independent work time.

• probably just the difficulty of the subject and me trying to catch up.

• nothing but myself

• I think that the pace at which the course is going makes it more challenging to grasp the concepts and in depth as I would like.

• Not enough office hours maybe?

• NA

36 - How could this course be changed to better facilitate your learning in your primary mode of participation?Best experience, example, etc.
Oleksiy Al-saadi

Response Rate	7/11 (63.64%)

• N/A

• Don't use Zybook as much.

• Really good

• n/a

• Pausing in between working to get a "hint" or better method is kind of annoying, but oh well. When you are in the flow and figuring it out and than having to stop and then remember what you were doing. Maybe saying in 20 minutes exactly we will be given new information would better prepare. Like dont start a whole new block of code when you only have 1 minute left.

• Have some office hours during the weekend for people that also work during the week and can't get help

• I do not think there is any. Prof. Al-saadi does a great job.
